Coreo Bundle Features

Included with machine - Basic Machine Operation (BMO)	
Part Number:	C5.0-BMO-MC1.0 and/or "-CBMO" Extension to Existing Controller Part Numbers
Coreo Connect: Get started quickly	**Connect Includes:** -Guided setup through a simple license/dongle installation -Easy connect and instant access to MultiCam Machines from a user friendly launch window -Provide Convenient access to other Coreo programs -Powerful trouble shooting tools with controller support download function
Coreo Command: Computer graphical operator interface to execute machine files	**Command Basic Includes:** - Opens CNC, Images, XML -Access job listings and execute directly from computer or keypad - Graphical job preview on computer or keypad -Ability to queue multiple CNC job files from one job execution - Graphical Proximity restart -Library of recommended tools, speed, feeds of common materials
Coreo Report:	**Provides Ability to:** -Calendar of job history

MULTICAM
Complete CNC Solutions

Oct 18, 2017

Coreo Bundle Features

MultiCam — Complete CNC Solutions

Chart b: Coreo Router Bundle Features			
Coreo Bundle Descriptions	**Feature Bundles**		
	Lite	**Advanced**	**Ultimate**
Part Number:	C5.0-RL	C5.0-RA	C5.0-RU
Coreo Connect: Get started quickly	**Connect Includes:** -Guided setup through a simple license/dongle installation -Easy connect and instant access to MultiCam Machines from a user friendly launch window -Provide Convenient access to other Coreo programs -Powerful trouble shooting tools with controller support download function		
Coreo Design: Quickly and easily design parts	**Design Includes:** *Full Editing Capabilities-* -Ability to scale, size, fit & align -Complete Text Tools, Font Creator, and Editor. Complete Text Tools, with 100+ Engraver Fonts. *Graphics Features-* -Create and Edit Shapes, Objects and Graphics. Node editing for vectorized graphics. Black & White, and Color Vectorization -Comprehensive Import Filters: AI, EPS, PDF, DXF, PLT, allowing seamless interface import from multiple drawing packages.		
Coreo Build: Converts CAD drawings into CAM files 1) **Import** 2) **Tool Path** 3) **Nest** 4) **Output**	**Build Lite Includes:** *General-* -Import a Single CAD File -Single use Shape Library -Included Material Process Libraries *Tool Path-* -Toolpath Single Path per contour -Toolpath multiple contours of a single material per job -Two Processes per Job -Single Process per Contour *Nesting-* -Auto Block Shape Nesting	**Build Advanced Adds:** -Import multiple CAD Files at one time -Multiple use Shape Library -Import Job Parts List (txt, csv) -Job Run Time Estimation -Job Cost Quoting -Part Labeling -Tapping and Drilling Support *Tool Path-* - Multiple Materials per Job - Multiple Processes per Job - Multiple Process per Contour	**Build Ultimate Adds:** -Import AutoCAD DWG files -Random Shape Nesting -Common-Line Cutting -Material Sheet Inventory -Sheet Remnant Tracking
Tool Technologies- Advanced Router:	**Advanced Router:** -Support for continuous multi-pass, bridging and tabbing, onion skin, pocketing, rough pass. -Optimize gang drills, part hold and vacuum.		
Advanced Knife:	*(Not available in this bundle.)*	**Advanced Knife:** -Tool pathing optimized using the knife blade profile library. -Supports stop short, cut back, corner rounding, and contour smoothing	
Coreo Command: **Computer graphical operator interface to execute machine files**	**Command Basic Includes:** - Opens G code & Common Images - Graphical job preview - Graphical Proximity restart	-Access job listings and execute directly from computer or keypad -Ability to queue multiple CNC job files from one job execution -Library of recommended tools, speed, feeds of common materials	
Factory Upgrades- Coreo Command Pro:	*(Not available in this bundle.)*	**Command Pro Adds:** -Graphical Contour Editor -Mobile App Support -Assign Processes -Email Notification -Import AutoCAD DXF, AI, PDF, UCD & XML Files -Generate Tool Paths	
Coreo Vision:	*(Not available in this bundle.)*	**Vision:** -Support for media alignment, via registration marks. -Support for barcode reading.	
Coreo Report:	**Provides Ability to:** -Calendar of job history
